MEMORANDUM FOR: DS&T Career Development Staff  
Headquarters Room 6E60

FROM: [REDACTED]  
Chief, User Support Function, CIB/ED/OEG/NPIC

25X1

SUBJECT: Application for DS&T Assignment Program

I wish to be considered under the DS&T Assignment Program for a temporary change of assignment outside of NPIC. Having served at NPIC for nine years in several management and technical assignments, I am most interested in an opportunity to enrich my career development by the serving in another office.

While I am applying for a rotational assignment within two specific organizations, I am open to and interested in other possibilities where both the Agency and I would benefit. As indicated in my attached application, I wish to be considered for an assignment in either the Office of Research and Development as a physical scientist or as a planning officer/office referent with the DS&T Planning and Resources Staff. Either would allow me the opportunity to learn new skills and gain insight into other office environments and at the same time draw upon my initiative, problem solving skills, and experience gained in imagery analysis and the NPIC development program.

I look forward to hearing of the assignment program review board's decision. Since I am currently attending the DS&T Career Development Course, I can be contacted through their office.
